FOCUS ON

A great of textures

Sophisticated grandeur

Uniqueness in design is embodied in a new storage solution: an imposing and distinctive cabinet, finished in a brilliant white that exudes elegance. Its surface, as lustrous as a mirror, makes this solution a focal point that enhances any setting. The feature that immediately catches the eye is a captivating detail: a leather bow tie that acts as a central decorative element. This touch of softness offers a delightful contrast to the solid, polished texture of the entire unit. The pure aesthetic is further enriched by components finished in 24-carat gold, representing a symbol of unparalleled splendour. Despite the sumptuousness of its appearance, the cabinet's functional-

ity does not take a back seat. The unit is equipped with a circular handle featuring a biometric opening system, a symbol of impeccable security. Inside, the cabinet reveals itself to be a veritable jewel box, with a series of lined drawers and a pull-out leather jewellery case, complete with meticulously stitched handles.
