

**It is the first time when Angstrom represents its product range in the United Arab Emirates.**

*The company will take part in one of the largest exhibitions of furniture and interior design in the Middle East Index Dubai 2023. The exhibition will take place in Dubai in May 23-25.*

It is an annual exhibition at the Dubai World Trade Center and it unites designers, architects, hotel and HoReCa owners, as well as distributors of furniture and interior design from 76 countries around the world.

Angstrom will be represented at the stand of the Russian Export Center. The company will show an exposition in fusion style that combines the samples of the best collections, which received prestigious Russian awards in the sphere of industrial design. The main idea of the stand is to express love for furniture, interior beauty and home comfort.

*- Participation in Index Dubai 2023 is our opportunity to take a closer look at a new market. Russian furniture manufacturers used to treat with caution markets in Asia and North Africa, but, nowadays, we are starting to explore these regions more carefully and we see great potential in such collaboration. These are fast developing regions with the continuous construction of residential areas, including rental housing, and generally escalating business. We are certain that we have something to offer. First of all, we are planning to cooperate in B2B sales,*  
*- said Vadim Chernushkin, Executive Director of Angstrom.*

Today the portfolio of the Angstrom brand includes 19 collections of furniture in various styles, and each can be made in any size and modification according to the customer's request. It would be a convenient solution for hotels, HoReCa or office space. Moreover, our own design office and the company's facilities allow us to produce customized furniture **with almost no limits to your imagination and our capability или no matter how complex it may be.**

15 Russian companies are represented in Index Dubai 2023. This is the most impressive number of participants in recent years.

***REFERENCE: Angstrom is one of the largest furniture companies in Russia. There are 19 collections of furniture varying from hallways to kitchens, each of them can be modified to any room or customized. The company was founded in 1991 as a small family business. Today, Angstrom has 5 factories that perform a complete production cycle: woodworking and metalworking, manufacturing of cabinet-type and upholstered furniture, various types of furniture fronts, as well as customized furniture. The company has 2500 employees. In 2020 the company built its own factory of furniture fronts, which applies 12 processing technologies. The factory produces about 200,000 furniture fronts and other pieces per month. Angstrom has one of the largest retail chain of 400 stores in Russia. The company's product range is sold in 8 countries around the world.***
