About us

The company «Alumpark» is a modern Russian production of anodized aluminum lighting equipment for the improvement of public spaces. We produce aluminum poles, luminaires, anchorage devices, brackets and other accessories.

In-house production

The company is located in Izhevsk, products are delivered to all regions of Russia, as well as the CIS and other countries.

We have been working since 2021, but we have already managed to make lighting products for public gardens, squares, embankments and boulevards in Nizhny Novgorod, Ufa, Anapa, Mineralnye Vody and other cities of Russia.

Why should you choose us?

Full cycle production

You can order a turnkey lighting system from us - from the development of an idea to its implementation. Our specialists will make lighting and wind calculations free of charge, select products for any budget.

Well-organized work of the production

All production sites are located in one place, which reduces logistics and production time. The production line of our company is equipped with innovative robotic equipment that allows to create 4 supports per hour.

High quality of output products

Our products are made of anodized aluminum, so they have not only good decorative, but also protective qualities. The products are resistant to aggressive environment and have a service life of about 50 years. We have guarantee and post- guarantee service.

It is also possible to order the coloring of poles in different colors - in our palette of up to 12 colours to choose from.

Flexible pricing policy of the company

There are different price segments of products in the catalog: our managers will select products for any budget.
